2024 PHST Recruitment – shortlist score distribution (round 1) – audiovestibular medicine

The graph below shows the distribution of shortlist scores (verified self-assessment scores) awarded to audiovestibular medicine applications which reached the evidence verification stage in 2024 PHST recruitment round 1.

The number of applications included in shortlisting was 17; the shortlist score was **18-41** (min and max possible were 0-50). Mean and median averages achieved were **27 and 25** respectively.

2023 PHST Recruitment – shortlist score distribution (round 2) – audiovestibular medicine

The graph below shows the distribution of shortlist scores (verified self-assessment scores) awarded to audiovestibular medicine applications which reached the evidence verification stage in 2023 PHST recruitment round 2.

The number of applications included in shortlisting was 6; the shortlist score was **20-44** (min and max possible were 0-50). Mean and median averages achieved were **30 (30.8)** and **30** respectively.

2023 PHST Recruitment – shortlist score distribution (round 1) – audiovestibular medicine

The graph below shows the distribution of shortlist scores (verified self-assessment scores) awarded to audiovestibular medicine applications which reached the evidence verification stage in 2023 PHST recruitment round 1.

The number of applications included in shortlisting was 4; the shortlist score was **14-44** (min and max possible were 0-50). Mean and median averages achieved were **33** (32.5) **and 36** respectively.

2022 PHST Recruitment – shortlist score distribution (round 2) – audiovestibular medicine

The graph below shows the distribution of shortlist scores (verified self-assessment scores) awarded to audiovestibular medicine applications which reached the evidence verification stage in 2022 PHST recruitment round 2.

The number of applications included in shortlisting was 4; the shortlist score was **2-40** (min and max possible were 0-58). Mean and median averages achieved were **35** (24.75) and **29** respectively.

2022 PHST Recruitment – shortlist score distribution (round 1) – audiovestibular medicine

The graph below shows the distribution of shortlist scores (verified self-assessment scores) awarded to audiovestibular medicine applications which reached the evidence verification stage in 2022 PHST recruitment round 1.

The number of applications included in shortlisting was 5; the shortlist score was **9-47** (min and max possible were 0-58).

Mean and median averages achieved were **36** and **41** respectively.

2021 ST3 Recruitment – shortlist score distribution (round 2) – audiovestibular medicine

The graph below shows the distribution of shortlist scores (verified self-assessment scores) awarded to audiovestibular medicine applications which reached the evidence verification stage in 2021 ST3 recruitment round 2.

The number of applications included in shortlisting was 4; the shortlist score was **0-19** (min and max possible were 0-68).

Mean and median averages achieved were **10 and 11** respectively

2020 ST3 Recruitment – shortlist score distribution (round 2) – audiovestibular medicine

The graph below shows the distribution of shortlist scores awarded to all audiovestibular medicine applications submitted in 2021 ST3 recruitment round 1. The number of applications included in shortlisting was 10; shortlist scores ranged from 4-36 (min and max possible were 0-56). Mean and median averages achieved were 16 (16.4) and 14 (13.5) respectively.

2020 ST3 Recruitment – shortlist score distribution (round 2) – audiovestibular medicine

The graph below shows the distribution of shortlist scores (verified self-assessment scores) awarded to audiovestibular medicine applications which reached the evidence verification stage in 2020 ST3 recruitment round 2.

The number of applications included in shortlisting was **6**; the shortlist score was **6-54** (min and max possible were 0-68).

Mean and median averages achieved were **24** (24.33) and **21** respectively

2020 ST3 Recruitment – shortlist score distribution (round 1) – audiovestibular medicine

The graph below shows the distribution of shortlist scores awarded to all audiovestibular medicine applications submitted in 2020 ST3 recruitment round 1.

The number of applications included in shortlisting was **6**; shortlist scores ranged from **15-63** (min and max possible were 0-80).

Mean and median averages achieved were **43** (42.50) and **42** respectively.

2019 ST3 Recruitment – shortlist score distribution (round 2) – audiovestibular medicine

The graph below shows the distribution of shortlist scores awarded to all audiovestibular medicine applications submitted in 2019 ST3 recruitment round 2.

The number of applications included in shortlisting was **1**; the shortlist score was **40** (min and max possible were 0-80).

We have not included a graph as there were not enough applications included in shortlisting

2019 ST3 Recruitment – shortlist score distribution (round 1) – audiovestibular medicine

The graph below shows the distribution of shortlist scores awarded to all audiovestibular medicine applications submitted in 2019 ST3 recruitment round 1.

The number of applications included in shortlisting was **4**; shortlist scores ranged from **38-44** (min and max possible were 0-80).

Mean and median averages achieved were **42** (41.75) and **43** respectively.

2018 ST3 Recruitment – shortlist score distribution (round 1) – audiovestibular medicine

The graph below shows the distribution of shortlist scores awarded to all audiovestibular medicine applications submitted in 2018 ST3 recruitment round 1.

The number of applications submitted was **9**; shortlist scores ranged from **22-58** (min and max possible were 0-80).

Mean and median averages achieved were **39** (39.33) and **39** respectively.

2017 ST3 Recruitment – shortlist score distribution (round 1) – audiovestibular medicine

The graph below shows the distribution of shortlist scores awarded to all audiovestibular medicine applications submitted in 2017 ST3 recruitment round 1.

The number of applications submitted was **8**; shortlist scores ranged from **32-59** (min and max possible were 0-78).

Mean and median averages achieved were **44** and **42** respectively.

2016 ST3 Recruitment – shortlist score distribution (round 1) – audiovestibular medicine

The graph below shows the distribution of shortlist scores awarded to all audiovestibular medicine applications submitted in 2016 ST3 recruitment round 1.

The number of applications submitted was **10**; shortlist scores ranged from **27-57** (min and max possible were 0-78).

Mean and median averages achieved were **43** (42.7) and **44** respectively.

2015 ST3 Recruitment – shortlist score distribution (round 1) – audiovestibular medicine

The graph below shows the distribution of shortlist scores awarded to all audiovestibular medicine applications submitted in 2015 ST3 recruitment round 1.

The number of applications submitted was **10**; shortlist scores ranged from **19-64** (min and max possible were 0-78).

Mean and median averages achieved were **44** (44.1) and **47** respectively.
