

PHST endocrinology and diabetes mellitus recruitment – shortlist score data (2013-2024)

This document contains shortlist score data for PHST endocrinology and diabetes recruitment. Graphs depicting the distribution of shortlisting scores are presented for both rounds 1 & 2. Tables showing the percentage of applicants interviewed at their first-choice regional preferences are included for 2020 Round 1.

PHST endocrinology and diabetes mellitus recruitment – shortlist score distribution 2024 (round 1)

The graph below shows the distribution of shortlist scores (verified self-assessment scores) awarded to all endocrinology and diabetes mellitus which reached the evidence verification stage in 2024 PHST recruitment round 1.

The number of applications proceeding to the shortlisting stage was **264**; shortlist scores ranged from **6 - 64** (min and max possible were 0-70).

Mean and median averages achieved were **38** (38.0) and **38** respectively.

Physician Specialty Recruitment Office

2023 PHST Recruitment – shortlist score distribution (round 2)

The graph below shows the distribution of shortlist scores (verified self-assessment scores) awarded to all endocrinology and diabetes mellitus which reached the evidence verification stage in 2023 PHST recruitment round 2.

The number of applications proceeding to the shortlisting stage was **120**; shortlist scores ranged from **11-66** (min and max possible were 0-70).

Mean and median averages achieved were **39** (39.1) and **39** respectively.

2023 PHST Recruitment – shortlist score distribution (round 1)

The graph below shows the distribution of shortlist scores (verified self-assessment scores) awarded to all endocrinology and diabetes mellitus which reached the evidence verification stage in 2023 PHST recruitment round 1.

The number of applications proceeding to the shortlisting stage was **252**; shortlist scores ranged from **5-65** (min and max possible were 0-70).

Mean and median averages achieved were **38** (38.0) and **37.5** respectively.

2022 PHST Recruitment – shortlist score distribution (round 2)

The graph below shows the distribution of shortlist scores (verified self-assessment scores) awarded to all endocrinology and diabetes mellitus which reached the evidence verification stage in 2022 PHST recruitment round 2.

The number of applications proceeding to the shortlisting stage was **127**; shortlist scores ranged from **13-58** (min and max possible were 0-78).

Mean and median averages achieved were **36** (36.15) and **36** respectively.

2022 PHST Recruitment – shortlist score distribution (round 1)

The graph below shows the distribution of shortlist scores (verified self-assessment scores) awarded to all endocrinology and diabetes mellitus which reached the evidence verification stage in 2022 PHST recruitment round 1.

The number of applications proceeding to the shortlisting stage was **292**; shortlist scores ranged from **9-69** (min and max possible were 0-78).

Mean and median averages achieved were **37** (36.54) and **37** respectively.

2020 ST3 Recruitment – shortlist score distribution (round 2)

The graph below shows the distribution of shortlist scores (verified self-assessment scores) awarded to all endocrinology and diabetes mellitus which reached the evidence verification stage in 2020 ST3 recruitment round 2.

The number of applications proceeding to the shortlisting stage was **127**; shortlist scores ranged from **0-60** (min and max possible were 0-68).

Mean and median averages achieved were **30** (30.47) and **30** respectively.

2020 ST3 Recruitment – endocrinology and diabetes (round 1)

Outcome of shortlisting

The table below describes what proportion of applicants could be invited to interview at their first-choice regional preference.

Region	1 st pref interviewees
East Midlands, East of England & West Midlands	90.90%
London and South East	67.61%
North East, North West & Yorkshire	64.38%
South West, Thames Valley, Wessex	81.82%
Scotland	100%
Wales	100%
Overall	77.82%

* This column describes the percentage of (eligible) candidates who nominated a particular region as first-choice and were subsequently shortlisted for interview there.

Please note – there is not a pre-set ‘cut-off’ score which candidates were required to achieve, it is based purely on the lowest score achieved within the interview capacity.

Candidates whose employment is subject to the resident labour market test are only considered after other candidates regardless of their application score.

In some cases tie-breaker criteria may need to be employed to separate applications with the same score; consequently there could be cases where applicants have the same score and first choice but are not both allocated.

2020 ST3 Recruitment – shortlist score distribution (round 1)

The graph below shows the distribution of shortlist scores awarded to all endocrinology and diabetes mellitus applications submitted in 2020 ST3 recruitment round 1.

The number of applications proceeding to the shortlisting stage was **275**; shortlist scores ranged from **7-70** (min and max possible were 0-80).

Mean and median averages achieved were **37** (36.96) and **36** respectively

2019 ST3 Recruitment – shortlist score distribution (round 2)

The graph below shows the distribution of shortlist scores awarded to all endocrinology and diabetes mellitus applications submitted in 2019 ST3 recruitment round 2.

The number of applications proceeding to the shortlisting stage was **141**; shortlist scores ranged from **7-56** (min and max possible were 0-80).

Mean and median averages achieved were **31** (31.36) and **30** respectively.

2019 ST3 Recruitment – endocrinology and diabetes (round 1)

Outcome of shortlisting

The table below describes what proportion of applicants could be invited to interview at their first-choice regional preference.

Region	1 st pref interviewees
East Midlands, East of England, West Midlands	93%
London and South East	94%
North West, North East, Yorkshire	100%
South West, Thames Valley, Wessex	100%
Scotland	100%
Wales	100%
Overall	96.5%

2018 ST3 Recruitment – shortlist score distribution (round 1)

The graph below shows the distribution of shortlist scores awarded to all endocrinology and diabetes mellitus applications submitted in 2018 ST3 recruitment round 1.

The number of applications proceeding to the shortlisting stage was **133**; shortlist scores ranged from **2-70** (min and max possible were 0-80).

Mean and median averages achieved were **36** (36.31) and **36** respectively.

2018 ST3 Recruitment – shortlist score distribution (round 2)

The graph below shows the distribution of shortlist scores awarded to all endocrinology and diabetes mellitus applications submitted in 2018 ST3 recruitment round 2.

The number of applications proceeding to the shortlisting stage was **92**; shortlist scores ranged from **8-56** (min and max possible were 0-80).

Mean and median averages achieved were **35** (34.6) and **33.5** respectively.

2017 ST3 Recruitment – shortlist score distribution (round 1)

The graph below shows the distribution of shortlist scores awarded to all endocrinology and diabetes mellitus applications submitted in 2017 ST3 recruitment round 1.

The number of applications submitted was 140; shortlist scores ranged from 0-64 (min and max possible were 0-78).

Mean and median averages achieved were 36 (35.65) and 36 respectively.

ST3 Recruitment – shortlist score distribution 2017 (round 2)

The graph below shows the distribution of shortlist scores awarded to all endocrinology and diabetes mellitus applications submitted in 2017 ST3 recruitment round 2.

The number of applications submitted was **66**; shortlist scores ranged from **16-60** (min and max possible were 0-80).

Mean and median averages achieved were **34** (33.84) and **33** respectively.

ST3 Recruitment – shortlist score distribution 2016 (round 1)

The graph below shows the distribution of shortlist scores awarded to all endocrinology and diabetes applications submitted in 2016 ST3 recruitment round 1.

The number of applications submitted was **143**; shortlist scores ranged from **10-69** (min and max possible were 0-78).

Mean and median averages achieved were **38** (37.68) and **38** respectively.

ST3 Recruitment – shortlist score distribution 2016 (round 2)

The graph below shows the distribution of shortlist scores awarded to all endocrinology and diabetes applications submitted in 2016 ST3 Recruitment round 2.

The number of applications submitted was **67**; shortlist scores ranged from **17-61** (min and max possible were 0-78).

Mean and median averages achieved were 35 (34.51) and 34 respectively.

ST3 Recruitment – shortlist score distribution 2015 (round 1)

The graph below shows the distribution of shortlist scores awarded to all endocrinology and diabetes applications submitted in 2015 ST3 recruitment round 1.

The number of applications submitted was **152**; shortlist scores ranged from **11-66** (min and max possible were 0-78).

Mean and median averages achieved were **37** (37.13) and **37** respectively.

ST3 Recruitment – shortlist score distribution 2015 (round 2)

The graph below shows the distribution of shortlist scores awarded to all endocrinology & diabetes applications submitted in 2015 ST3 recruitment round 2.

The number of applications submitted was **54**; shortlist scores ranged from **19-59** (min and max possible were 0-78).

Mean and median averages achieved were **34.04** and **31.5** respectively.

ST3 Recruitment – shortlist score distribution 2014 (round 1)

The graph below shows the distribution of shortlist scores awarded to all endocrinology & diabetes applications submitted in 2014 ST3 recruitment round 1.

The number of applications submitted was **147**; SL scores ranged from **6-58** (min and max possible were 0-78).

Mean, median averages achieved were **35** (35.17) and **34** respectively.

ST3 Recruitment – shortlist score distribution 2014 (round 2)

The graph below shows the distribution of shortlist scores awarded to all endocrinology & diabetes mellitus applications submitted in 2014 ST3 recruitment round 2.

Physician Specialty Recruitment Office

The number of applications submitted was **55**; shortlist scores ranged from **2-52** (min and max possible were 0-78).

Mean and median averages achieved were **33** (33.02) and **34** respectively.

ST3 Recruitment – shortlist score distribution 2013 (round 1)

The graph below shows the distribution of shortlist scores awarded to all endocrinology & diabetes mellitus applications submitted in 2013 ST3 recruitment round 1.

The number of applications submitted was **166**; SL scores ranged from **10-65** (min and max possible were 0-78).

Mean, median and modal averages achieved were **35** (34.92), **33.5** and **29** respectively.

ST3 Recruitment – shortlist score distribution 2013 (round 2)

The graph below shows the distribution of shortlist scores awarded to all endocrinology & diabetes mellitus applications submitted in 2013 ST3 recruitment round 2.

The number of applications submitted was **84**; SL scores ranged from **13-56** (min and max possible were 0-78).

Mean, median and modal averages achieved were **33** (33.52) and **34** respectively.
