

PHST general internal medicine recruitment – final assessment score distribution

The graph within this document show the distribution of interview scores for round 2 of PHST recruitment since 2022.

The scores are recorded for each candidate attending an interview, including those that were found not to be appointable.

All scores here have been rounded to the nearest whole number; and only those candidates who received both a score for their submitted application form and performance at interview have been included here. See the pages below for the number of candidates, including the percentage of those deemed appointable and non-appointable, interviewed in each round of recruitment; the range of scores obtained and the mean and median scores achieved across all candidates.

Where details for a specific year or round are not included, this should be taken to mean that the specialty was not participating in a particular round or that the specialty at that point in time had not yet joined the nationally-coordinated recruitment process.

2023 PHST Recruitment – final assessment score distribution (round 2)

The graph below shows the distribution of final assessment scores awarded to **general internal medicine** candidates assessed at interview in PHST 2023 ST4 recruitment round 2.
